Big Sky Economic Development Job Creation Project

B.E. Forest Products
USE OF BSTF FUNDS

PURCHASE OF EQUIPMENT

LEASE RATE REDUCTION
BE Forest Products produces a superior custom lumber product through its use of cutting edge proprietary manufacturing technology.
At the start of 2016 BE Forest Products was able to secure a contract with Home Depot. The original thought was for a contract for 200 west coast stores and instead they were able to secure a contract for all of the United States for their specialty Ghost Wood product.
Do to the persistence of BE Forest Products landing a new distributor at the last reporting, BE Forest was back to the 7 net new jobs with plans to create 6 new jobs within the next 4 months.
One example of their many colors of “Ghost Wood”
